

Statement

EpiCalsome™

EpiCalsome™ is a new superior calcium delivery system based on hydrogenated phospholipids. The product was developed by Mibelle Group Biochemistry, Switzerland in 2022 for cosmetic applications.

We hereby confirm, that EpiCalsome™ has been evaluated for its safety as cosmetic ingredient, at recommended use level. EpiCalsome™ satisfies, according to the current state of knowledge, the safety requirements for the intended applications, at recommended concentrations under normal and reasonably foreseeable conditions of use.

To the best of our knowledge, we believe that no undesired side effects are to be expected if used according to suggested use levels for topical applications.

Up to this date we never got any information on negative impacts when using our active EpiCalsome™. Based on the composition we don't think that there should be any negative aspect on babies and infants. However, no specific safety tests have been conducted.
